

Amendment To The Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A hair oil consisting essentially of a blend of:

- (i) from ~~10~~20% to ~~95~~80%, by weight based on total weight, of a first oily component selected from the group consisting of coconut oil, sunflower oil, almond oil and mixtures thereof; and
- (ii) from ~~5~~20% to ~~90~~80%, by weight based on total weight, of a second oily component which is light mineral oil having a viscosity at 25 to 30°C of from 0.0001 to 0.5 Pa.s.

Claim 2-5 (canceled)

①
Claim 6 (previously presented): A hair oil according to claim 1, in which the first oily component:light mineral oil weight ratio ranges from 95:5 to 5:95.

Claim 7 (currently amended): A hair oil according to claim 1, which is in an anhydrous form.

Claim 8 (previously presented): A hair oil according to claim 6, wherein said first oily component:light mineral oil weight ratio ranges from 90:10 to 10:90.

Claim 9 (previously presented): A hair oil according to claim 6, wherein said first oily component:light mineral oil weight ratio ranges from 80:20 to 20:80.

Claim 10 (currently amended): A hair oil consisting essentially of:

- (i) from ~~10~~20% to ~~95~~80%, by weight based on total weight, of a first oily component which is one or more glyceride fatty esters, and
- (ii) from ~~5~~20% to ~~90~~80%, by weight based on total weight, of a second oily component which is one or more hydrocarbon oils each with a viscosity at 25 to 30°C of from 0.0001 to 0.5 Pa.s and being selected from the group consisting of a light mineral oil, straight chain hydrocarbon oils containing from 6 to 16 carbon atoms, branched chain hydrocarbon oils containing from 6 to 20 carbon atoms and blends thereof.

Claim 11 (new): A hair oil according to claim 1, in which the total content of said light mineral oil ranges from 20% to 40% by weight based on total weight of said hair oil.

Claim 12 (new): A hair oil according to claim 10, in which the total of said second oily component ranges from 20% to 40% by weight based on total weight of said hair oil.

Claim 13 (new): A method for conditioning hair comprising applying to the hair a hair oil comprising:

- (i) from 20% to 80%, by weight based on total weight, of a first oily component which is one or more glyceride fatty esters, and
- (ii) from 20% to 80%, by weight based on total weight, of a second oily component which is one or more hydrocarbon oils each with a viscosity at 25 to 30°C of from 0.0001 to 0.5 Pa.s and being selected from the group consisting of a light mineral oil, straight chain hydrocarbon oils containing from 6 to 16 carbon atoms, branched chain hydrocarbon oils containing from 6 to 20 carbon atoms and blends thereof.
